

PREMIDOOR 88

Lift/sliding door system

KÖMMERLING®

THE SUITABLE DOOR FOR YOUR WORLD

Doors and windows form part of your living space and your own personal living environment. You should therefore give your full attention to your decision for the right door system.

Link between house and garden.

PremiDoor 88 lets you experience an all new feeling for living. Whether green nature or urban skyline, large glazed areas remove the borders between inside and outside. PremiDoor 88 is an all new design of lift/sliding door. With the maximum opening and closing convenience, excellent insulating values, and aesthetic architectural elegance.

Impervious to driving rain, wind, and outside noise – here too, PremiDoor 88 presents a convincing range of outstanding performance properties. PremiDoor 88 features an innovative gasket technology embodying the perfect interaction of three levels.

Maximum living comfort – perfect energy balance.

The desire for ever larger, undivided glass surfaces and more openness continues. At the same time, it is important to comply with increasingly strict energy-saving regulations. To meet both requirements, PremiDoor 88 is made of the innovative 88 mm profile. This profile system is characterised by its large construction depth, which enables high stability and excellent insulation values as well as a wide range of glazing.

In addition, PremiDoor 88 offers you all design options. From noble aluminium shells for an almost unlimited variety of colours through refinement techniques such as anodising and powder coating in all available RAL colours up to high-quality plastic films in plain colours and attractive wood decors.

- High profile stability for floor to ceiling elements up to 2.90 m.
- Excellent heat transfer coefficient $U_T = 1.2-1.3 \text{ W}/(\text{m}^2\text{K})$, an optional U_D value of max $0.8 \text{ W}/(\text{m}^2\text{K})$ is possible.
- Barrier free transition from inside to outside – high insulation WPC threshold
- Reliable functionality, great handling ease, easy to open and close as if sliding on air
- Three sealing levels ensure the optimal protection against wind, rain, and outside noise.
- Aluminium covers for virtually unlimited colour potential

Opening modes:

One lift/sliding sash and one fixed pane

Two lift/sliding sashes and one fixed pane

One lift/sliding sash and two fixed panes

Two lift/sliding sashes with floating mullion version and two fixed panes
